

QUICK START

Quickly find your way around
our crypto investment service.

Welcome to VF-Blockchain!

We warmly welcome you to VF-Blockchain, the premium investment service tailored to the world of cryptocurrencies and blockchain technology. This quick-start guide will walk you through everything you need to know to get started, including access to our portfolios, how we operate, and how to stay up-to-date.

Let's first cover a few technical essentials. 

Accessing the Premium Area

With your personal login details (username and password – sent via separate email after signup), you gain full access to the **Premium Area** at vf-cm.com.

There you'll find:

- ✓ All e-books and special reports
- ✓ Weekly main letter issues
- ✓ Model portfolio allocation

Email Delivery Tips

To ensure smooth delivery of our emails:

- Check your **spam folder** if you don't see our messages
 - Mark our emails as "important"
 - Add **info@vf-cm.com** to your contacts
-

Weekly Publications

VF-Blockchain's weekly reports are sent every **Monday** (52 issues per year). You'll receive:

- ✓ Strategic insights and commentary on crypto market developments
- ✓ Portfolio updates and strategic considerations
- ✓ Clear explanations of our investment rationale
- ✓ Orders always included at the end of each issue (PDF)

 Missed an issue? You can always download previous ones from the Premium Area.

Updates Based on Market Conditions

Markets can move fast — and so do we. If news, trades or changes occur outside of the weekly issue, we'll send:

- ✓ Updates about market developments
- ✓ Buy- or sell-orders with clear, actionable instructions
- ✓ Advance notice so you can trade under the same conditions as we do

 Transparency is key — our real-money portfolios are 100% traceable and clearly documented.

The Cryptosphere: How It Works

Unlike traditional stocks, cryptos operate differently. Here's what you need to know:

Crypto Brokers

Cryptocurrencies like **BTC** (Bitcoin) or **ETH** (Ethereum) aren't traded on stock exchanges like NYSE. You'll need a **crypto broker** to buy or sell them.

Recommended platforms:

- ✓ Binance (preferred)
- ✓ Coinbase
- ✓ ByBit, BitGet, and so on

 Opening an account is quick — usually just your email is required.

PS - Broker options can vary by region, but no worries — we always specify which platforms we use and list the top exchanges where each coin is tradable.

Storing Cryptocurrencies

You have three main options for storing your crypto assets:

1. On the Exchange

- Hold your crypto on platforms like Binance
- Insurance may cover losses (e.g., theft)
-  Requires secure passwords and basic safety steps

2. Software Wallets

- Apps like Exodus.io or Atomic Wallet
- Can store multiple cryptos
- Backup your wallet on a USB stick and encrypt it!

3. Hardware Wallets

- Devices like Ledger, Trezor, or OneKey
- Safest option, starting at around \$50–\$150
- Recommended for serious investors

 For privacy-focused users: check out Wasabi Wallet (BTC only).

 For crypto research and prices, we recommend coinmarketcap.com

Our Model Portfolios

We offer **three real-money model portfolios** that you can follow in full or selectively — depending on your personal goals, risk tolerance, and interests.

Conservative Coin Portfolio (CCP)

- ✓ Focus on the heavyweights of the crypto world
- ✓ Includes established projects like Bitcoin (BTC) and other top-tier digital assets
- ✓ Designed for long-term growth and a solid foundation in trusted cryptocurrencies
- ✓ Ideal for investors seeking reliability over hype

Speculative Coin Portfolio (SCP)

- ✓ Targets lesser-known, emerging cryptocurrencies
- ✓ Carefully selected for their disruptive tech and future growth potential
- ✓ Perfect for spotting hidden gems before they hit the mainstream
- ✓ For investors with a higher risk appetite

Blockchain Stocks Portfolio (BSP)

- ✓ Focuses on publicly traded companies embracing blockchain
- ✓ Includes firms integrating blockchain into their core business models
- ✓ Taps into the broader trend of blockchain transforming global industries

Important Note on Risk & Allocation

Cryptocurrencies can be highly rewarding — **but also very volatile**.

 Our recommendation:

- Limit crypto allocation to **5–15%** of your total investment capital
- The remaining capital should be in **traditional assets**
- For this, check out our service: **VF-Invest**

VF-Invest offers model portfolios for traditional markets, designed for long-term wealth building. Explore both services for a **well-balanced strategy**.

Final Takeaways

- ✓ Weekly reports delivered every Monday
- ✓ Updates and/or trade notifications sent when needed
- ✓ Clear access via the Premium Area
- ✓ Easy-to-follow, real-money portfolios

Ready to Dive In?

For the latest updates, detailed insights, and all current model portfolios, head over to the Premium Area. There you'll find our most recent weekly report, including market commentary, portfolio allocation, and more— everything you need to stay on track.
